Osaka Castle, Japan

Located near the center of Osaka Prefecture, Osaka Castle was built on flat land on the Uemachi Plateau, on the former site of the Ishiyama Honganji Temple. In 1583, Toyotomi Hideyoshi completed construction of this magnificent and splendid castle, which took three years in total. The castle fell in 1615 during the fighting known as the winter siege and summer siege of Osaka. Later, Tokugawa Hidetada rebuilt and greatly remodeled the castle. However, most of this remodeled Osaka Castle was destroyed during the Boshin War. Today's castle was restored in 1931, based on paintings of the original on folding screens. Together with those in Nagoya and Kumamoto, Osaka Castle numbers among Japan's three most important castles.

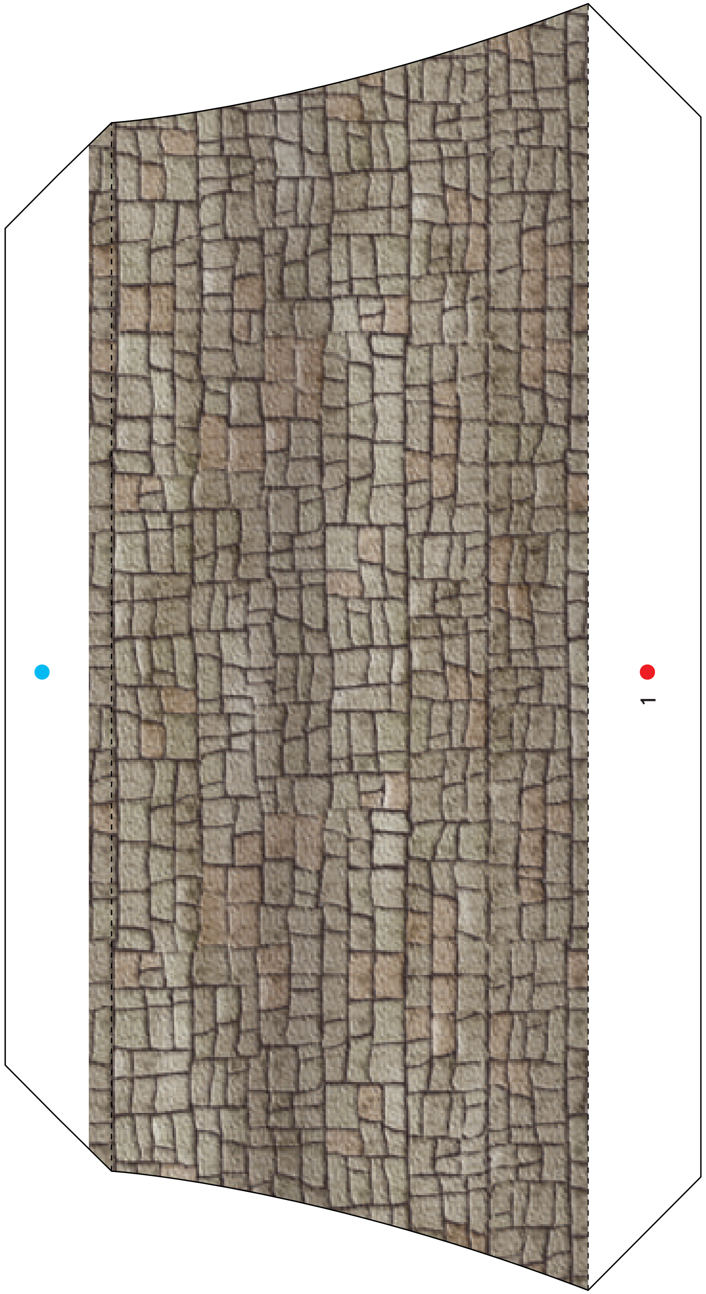

* This model was designed for Papercraft and may differ from the original in some respects.

■ Parts list (pattern) : Sixteen A4 sheets (No.1 to No.16)

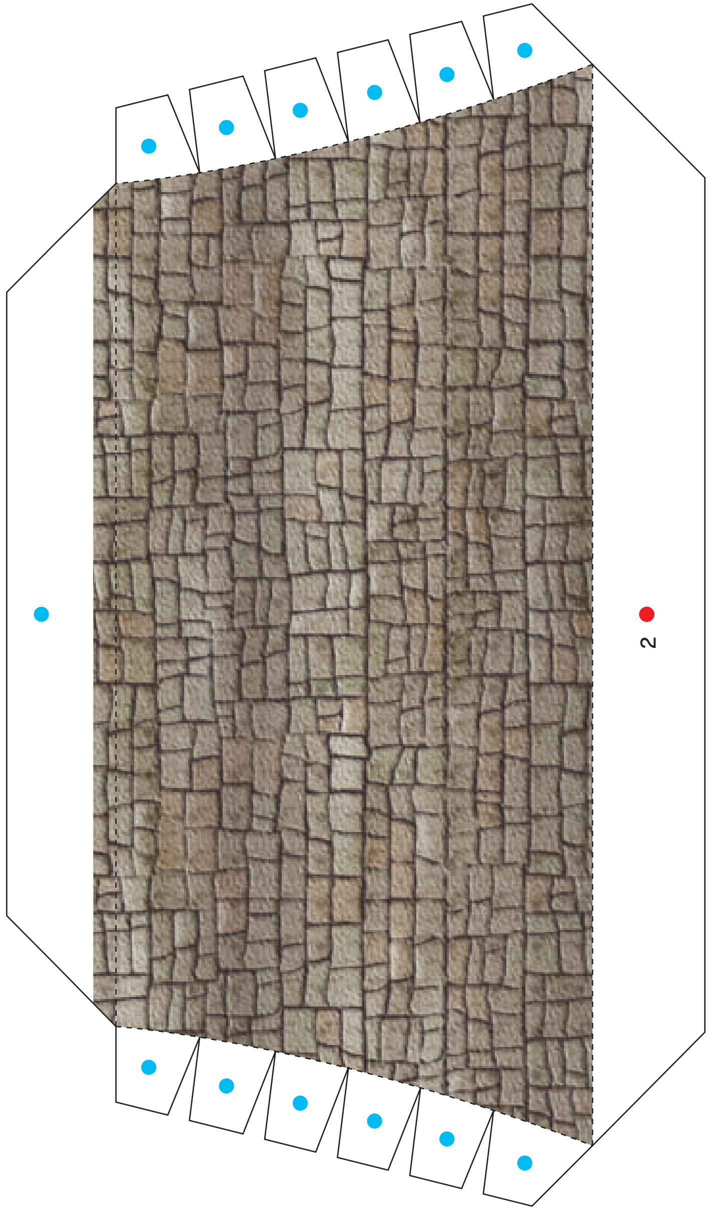

■ No. of Parts : 78

* Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.
